# BREEDING THE BEST RED ANGUS

**Welcome to GIG Cattle;** a premier Red Angus operation nestled in the beautiful Ozark Mountains of Missouri.  
**GIG Cattle builds Red Angus that work—period.**

Data-driven selection, elite cow families, and zero guesswork produce cattle with real-world performance, maternal strength, and efficiency. These cattle don't just look good on paper—they dominate in the pasture and pay their way.

**Contact us today to discover how these proven genetics can deliver results for you.**

## BJR DELLA 204K

**RAAA NUMBER:  
4580723**

BJR Della 204K excels in type, data, and pedigree with 15 top-tier EPDs (1–35%). Deep-bodied, wide-based, long-made female and arguably the most balanced sister to \$120K LSF BJR High Voltage 1803J.

## BJR DELLA 308L

**RAAA NUMBER:  
4745023**

BJR Della 308L, purchased in 2025 from Boot Jack Cattle, descends from the famed Della family. A Pie Captain 057 daughter and full sister to High Voltage, she combines elite phenotype and balanced EPDs.

ET daughter of BJR Dory Jiba 902G (\$21K), selected at the 2021 Red Revolution Sale. Balanced multi-trait EPDs, strong carcass data, elite maternal lineage, and standout phenotype.

## BJR DORY JIBA 207K

**RAAA NUMBER:  
4580729**

Lakina 0L32, purchased from Veto Valley Farms in 2025, anchors GIG genetics - by Identity 0295H and from the elite Lakina Y17 line. Top 1% ProS, seven top 10% EPDs; feminine, balanced, moderate-framed, proven producer.

## VETO LAKINA D6 0L32

## **TERMS**

All cattle sell under the terms and conditions outlined by the Red Angus Association of America. To view these terms visit: <http://redangus.org/marketing/sale-planner/sale-terms-conditions>.

## **ANNOUNCEMENTS**

A supplement sheet will be available sale day with updated information, corrections, and additional information. This sheet and any announcements made sale day and from the auction block during the sale will take precedence over printed material associated with this sale.

## **TRUCKING**

Transportation is the responsibility of the buyer. If you plan to be bidding off-site on sale day, please contact Brad Mosby or any of the sale representatives shown to start exploring transportation options before the auction. Cattle CANNOT be left at the sale facility for any length of time and need to find transportation closer to you immediately after the sale.

## **HEALTH**

All animals are eligible for interstate shipment. Interstate health papers will be prepared by sale day veterinarian at buyer's request.

## **PURCHASER'S**

All animals are the owner's risk prior to their sale and become property of the purchaser as soon as declared sold by the auctioneer. Buyers in this auction and Gilchrist Auction Company are regulated by the USDA Packers & Stockyards Act which requires your payment to be made within 4 days of purchase. Absentee/Internet Buyers should mail or wire payment to:

**Gilchrist Auction Co.**  
**14075 120th St.**  
**Douds, IA 52551**

## **LIVESTOCK MORTALITY INSURANCE**

James Bessler  
815-762-2641

## **LIABILITIES**

All persons who attend the sale do so at their own risk. The seller, auction facility, and sale manager assume no liability for any accidents that may occur. Neither does the seller, auction facility or sale manager assume liability for the loss or injury to livestock due to theft, disappearance, sickness, or act of God. It is to be clearly understood that the sale manager and its representatives act only as a medium between the buyer and the seller.

## *Sale Schedule*

3527 W. Kearney St. - Springfield, MO 65803

6 Miles East of Sale Barn On I-44, Exit 75

## **Welcome to the Show-Me Reds Sale**

It is time again for the annual Missouri Red Angus Show Me-Reds Sale and Meeting. With cattle markets continuing to thrive and green grass beginning to emerge, this is certainly an exciting time to be seeking additions to your herd. It is fair to assume that there are many options available to you as you search for cattle this spring. So, what sets this event apart? As a buyer, this sale is a unique opportunity to connect with a large group of progressive breeders in a single location. The breeders at this event are eager to both earn your business, as well as build lasting relationships. Whether you are long established in the Red Angus business, or just getting started, I assure you that you can find value in attending this phenomenal event.

One innovation that our association has implemented is the MORAA Fescue Belt Certification Program. Cattle from the fescue belt are more likely to thrive in our environment and in most environments in the U.S. As you browse the catalog, you will find cattle that qualify for the Fescue Belt Certification identified as such. The demand for quality Red Angus genetics is at an all-time high. As we look at trends in the beef industry, we know that it is time to build back the American cowherd. The maternal traits of mothering ability, fertility, docility, and longevity are hallmarks of Red Angus genetics.

In this offering you will find genetics from the top tier of the Red Angus breed. Whether you are shopping for a show heifer, registered cows, bulls, or commercial cows this offering has something for you. I would also like to suggest to those of you who may not be looking to purchase cattle, but who have a stake in the health of the Red Angus breed in Missouri, come see this event. I cannot stress enough the kindness, professionalism, and depth of knowledge you will find as you walk the pens here in Springfield. Sale cattle will be in & available for viewing on Saturday afternoon and early Sunday morning. Whether you intend to buy or just come visit, we truly look forward to seeing you on sale day. If you are unable to attend, don't hesitate to contact any of the consignors or buyer representatives listed in this catalog. Additionally, the sale will be broadcast live over the internet through DV Auction.

Please RSVP to join us for our Annual Meeting Dinner on Saturday night - we would love for you to join us.

Adam Brown - MORAA President

## *Fescue Belt Certified Program*

Many of us who live in the “fescue belt” have experienced the problems associated with importing newly purchased cattle into our environment. What we’ve seen is a significant percentage of cattle that have not been raised on fescue struggle to perform after being imported onto this “grass we love to hate”. Some animals eventually overcome this issue, but many will not and will eventually be culled from the herd.

Fescue toxicity results from toxins called ergot alkaloids, which are produced by a fungus called endophyte that grows within the fescue plant. Cattle experiencing fescue toxicosis may exhibit rough hair coats, heat stress, suppressed appetite, poor growth rates, reduced reproductive performance, and in some cases lost tail switches or even hooves. The decreased animal performance seen during the “summer slump” of cool-season pastures is made even worse by these toxic effects of fescue.

Research on the subject of fescue management has been done for years. Several strategies can be used to mitigate the toxic effects of fescue, including removal or suppression of seedheads, overseeding of pastures with legumes or other forages, and good mineral supplementation programs. However, fescue remains a serious challenge. The USDA estimates fescue toxicosis costs the U.S. beef industry an estimated \$600 million to \$1 billion annually in lost revenue because of reduced reproductive and growth rates in cattle herds.

The entire state of Missouri is situated within the fescue belt. Since fescue was introduced into our region, Missourians have built their herds retaining only genetics that have proven to be “fescue tolerant.” When looking for Red Angus genetics, look for the MORAA FBC logo & cattle that have “Bred-in Fescue Tolerance.”

The Show-Me-Select Replacement Heifer Program provides cattle producers with tools to enhance reproductive and genetic potential of their herds and improve ultimate profitability. The program transfers science-based knowledge that enables participants to make practical production decisions that impact their bottom line.

The Show-Me-Select Replacement Heifer Program is an educational conduit for beef producers, veterinarians and allied industry, and is focused on enhancing the adoption of reproduction and genetic/genomic technologies across Missouri. The program, which began in 1996, is the only statewide on-farm beef heifer development and marketing program of its kind in the United States.

Nearly 150,000 heifers, from more than 900 farms, are enrolled in the program. The marketing arm of the program has reported sales of almost 37,000 heifers into 20 states nationwide, with gross receipts of more than \$60 million. To date, MU's investment in implementing the Show-Me-Select Replacement Heifer Program has resulted in an estimated impact of \$200 million statewide.

Premium Red Baldy is a tagging program designed to take advantage of hybrid vigor by maximizing the best traits of both Red Angus and Hereford and providing commercial producers with premium replacement females. The program will help producers access genetically verified females that have the best combination of longevity, fertility and adaptability to incorporate into producers' herds.

To qualify for Premium Red Baldy, females must be sired by bulls in the top 50% of the breed for Baldy Maternal Index (BMI\$) or Profitability and Sustainability Index (ProS). Targeted breed percentages will range from 25%-75% for both breeds, with the balance being the alternate breed. Females must be red-bodied with either a bald or brockle face.

As the nation's cow herd expands to meet beef demand, Premium Red Baldy females will rise to the challenges of producing more beef sustainably and profitably, without sacrificing quality.

The Premium Red Baldy program has the ideal balance of maternal and carcass traits, which will yield cattle poised to increase the profitability of the commercial producer. Premium Red Baldy uses genetics supported by the only two beef breed associations backed by whole herd reporting.

 VETO 678S BLOCKANNA 2F11 **SINTEK LIVESTOCK**

Take a look at this wide based, deep sided, bold made Duff Red Blood X Blockanna mating, that goes back to the highly sought after Montana Creek sire and the prolific Maternal Grand Dam, Blockanna 6785. This moderate framed Red Blood son offers strength in maternal traits, including birth weight, calving ease, stay, milk, and heifer pregnancy. We purchased this bull last November, after our herd bull injured himself. We put him with later calving mature cows and we were thrilled with this aggressive breeder. McGraw's weight as of February 7th, 2026 is 1,764 pounds.

VETO FAYETTE JR 961 209K is a foundational cow in Red Angus breeding programs. She's balanced with good maternal traits, strong IMF (Intramuscular Fat) and REA (Ribeye Area) scores. Sired by PIE GET R Done 684Er, she's long sided, very clean fronted, moderate framed, & extremely feminine in her over-all design. She is balanced and has been an excellent mother with a nice udder and plenty of milk. Her calf VVF GIG Herdsman 204P (RAA# 5228549) born 2-10-26 and sired by PIE HERDSMAN 2012 who is a prominent Red Angus herd sire that was a highlight of the 2023 Pieper Red Angus production sale, where he sold for \$75,000. He is a direct son of KJL/CLZB Complete 7000H. He is recognized as a top calving ease prospect and ranks highly in genomically enhanced EPDs for growth and carcass traits.

VETO Lady 610 210K is balanced with excellent maternal traits. Lady is sired by Red Brylor. Pasquale 213P who is remembered for his low birth weights, exceptional maternal traits and high-quality progeny. Despite his untimely death, his genetic influence remains significant through limited available semen & progeny as we are offering. Her EZ FACTOR bull calf (RAAA 5228561) comes through the legendary breeding program of Veto Valley Farms. EZ FACTOR is a prominent Red Angus herd bull known for its specialized "calving ease" & high-quality carcass traits. His marbling EPD is in the elite top 2% along with \$Ranch and \$Profit both in the top 1% of the breed. He was a high-selling sire for Ludvigson Stock Farms dispersal in 2021.

We love these Hi Caliber X JK Jess calves. Stout from the ground up, wide based, with plenty of grow. JL HSL Cali 765D has plenty of muscle front to back, while still keeping some femininity and flash. She doesn't need much pressure on the halter and is already a sweetheart. Add in the fertility of her dam and full sib sister, and 765D has a bright future ahead of her.

JL HSL Darlin 1255 reminds me a lot of her dam at this stage, and 125H did great for me as a show heifer and has been a great cow for our operation. You can appreciate an easy-going cow, and 1255 is the same. Elegant and feminine, the way she's put together strikes me as something that will only get better with time. We've been using Wilbar Intuition 832J pretty heavily, and his daughters continue to impress us. The days ahead look good for this one.

Tim Orr was a big fan of G44 as a calf, and we're big fans of her as a cow. Her first heifer we've ever offered is long, clean-fronted, with lots of rib shape. JL HSL Blockanna 445 has flat come on since weaning, and with eight numbers in the top half of the breed for growth and carcass, she won't stop anytime soon. The Blockanna's make good females, and this Wilbar Intuition 832J calf will continue that pattern.

This Donor works, EDSL Red Queen first natural born heifer calf has been in show rings around Texas and placed high several times and won her class. Her ET calves hit the ground this last fall and to no surprise, they are outstanding with thickness, depth, clean fronted and tons of hair. She could do a lot in your program whether you want to flush her and make show calves or make well put together females for your program. Exposed to 1PF TRCC Divided reg# 5046791 from 12/17/25 to 2/12/26.

C-BAR MIMI 201K was our pick of the 2022 embryo heifer calves from the legendary C-BAR RANCH. She was halter broke and shown by me at two of the largest cow shows, NAILE and CATTLEMENS CONGRESS, gaining lots of compliments from many true cattlemen and women. This has been a no miss cow producing double digit embryos the two times she was flushed once convention, and IVF. This young cow has conceived every time she was AI. This young cow was A.I. To DUFF RED WARRIOR on 2/6/26 then pasture Exposed to PIE QUARTERBACK 0817. Confirm Safe to DUFF RED WARRIOR.

Donor prospect alert. Lacy Lakota 8162 064H is the kind that could stand in a donor pen and would make an impact in someone's program. She is thick, wide topped, deep ribbed, super easy keeping kind. Lacy Lakota puts power and muscle into her calves. Unfortunately due to weather she lost her calf on December 13th. She was exposed to 1PF TRCC Divided reg# 5046791 from 12/20/25 to 2/12/26. Breeding info will be updated on supplement sheet. She may sell open and ready to flush or breed to work with your program.

Blockanna 316J offers a compelling combination of phenotype and productivity. She is bold in her rib design, easy keeping, and fundamentally sound, complemented by a functional udder and strong maternal instincts. A flexible breeding piece with the ability to generate both scale-pushing calves and competitive show prospects. Out of the famed Feddes Blockanna 807 family and a daughter of U2 Dominion, this prime aged cow has limitless possibilities. AI bred to TAC Traveler (5011705) and pasture exposed to Pie Quarterback 0817 (4390513)

Schaf Tal Minola 903M (5149337) is a very attractive, correctly made bred heifer out of Veto Minola 903H903k (4740557), a LSF President daughter, the high seller in the 2024 Grasstime Sale and a young cow that will quickly make her way to the donor pen. Her sire is none other than the hottest bull in the Red Angus breed, Berwald Confident 2044 (4687927). Schaf Tal Minola 903M has been a standout since birth and the pick of the bred heifer group for many. Bid with confidence as this standout is sure to reward with long term production. Pasture exposed to Pie Quarterback 0817 (4390513) 2/6/2026.
